

5/8/2017

To whom it may concern,

Please count my voice as strongly in support of maintaining strong Net Neutrality with Title 2 oversight of ISPs. True Net Neutrality (and not the watered down version offered by Commissioner Pai) is vital to keeping the internet an engine of economic growth and innovation. Without a level playing field, the startups and disruptors of tomorrow will be crushed before they get off the ground.

Thank you,

John Kenyon
